## PDIL's green mission

Projects and Development India Ltd. (PDIL) has taken a step towards sustainable development and contributed to carbon credit through installation of an off-grid solar photo voltaic street lighting system in PDIL Bhawan Noida. This system shall operate the street lighting of

PDIL Bhawan automatically by switching 'on' at dusk, operating throughout the night for 12 hours and switching 'off' at dawn. It will save valuable grid power of 3000 W approx being consumed by the existing street lighting installation. R.G. Rajan, CMD, PDIL, inaugurated the system.
